## GENERAL LAND CAPABILITY CLASSES of NT PORTION 1918

### JUNO BLOCK - TENNANT CREEK

**MAP LOCALITY**

**TECHNICAL REFERENCES:**
- Land Assessment, Rangelands Division, Department of Land Resource Management, Palmerston, Northern Territory

**BIBLIOGRAPHIC REFERENCE:**
- Land Assessment, Rangelands Division, Department of Land Resource Management, Palmerston, Northern Territory

**DESCRIPTION**

1. **High**
   - Suitable land with minimal limitations. Highly productive requiring only low management practices. (Slope 0-3%, and rock outcrop < 5%; and soil depth > 1.5 m; and soil drainage - rapid to well; and erosion risk - low)

2. **Moderate**
   - Suitable land with only moderate limitations. Will require minor management practices. (Slope 1-3%, and rock outcrop - 0-2%; and soil depth 0.5 - 1.5 m; and soil drainage - moderate; and soil depth - 0.25-0.5 m; and soil drainage - imperfect to poor; and erosion risk - low)

3. **Marginal**
   - Land having severe limitations. Will require major management practices. (Slope 5-10%, and rock outcrop - > 10%; and soil depth 0.25-0.5 m; and soil drainage - poor; and erosion risk - high)

4. **Unsuitable**
   - Land not suitable for Agriculture, having extreme limitations. This includes undisturbed land with significant habitats, erosion risk due to steep slopes, soil depth, rocky outcrops, and poor drainage. (Slope > 10%, and rock outcrop - > 10%; and soil depth 0.25 m; and soil drainage - very poor; and erosion risk - very high)

**GENERAL FEATURES**

- Property boundary
- Main road
- Minor road
- Fenced / Track
- Drainage line
- Elevation contour / height (m AHD)
